

## LUMINOUS T-BEAM\* SPECIFICATION SHEET

Blend the economies of a T-Bar ceiling, and the great looks of T-Beam™ with a luminous diffuser, and you have an incredibly powerful visual statement.

T-Beam™ snaps to any, new or existing 15/16" wide flanged T-bar grid thus creating a three-dimensional beam appearance.

Add the durability and clean crisp look of .080 "Acryplex" Opal White Acrylic diffuser, a few lights, and you have "Luminous T-Beam™." Available in four standard finishes: White, Red, Black and Aluminum Gray as well as a variety of custom painted finishes.

Materials used in T-Beam™ (PVC) comply with UL 94 V-O test results. .080 Acrylic diffusers are approved for use where class 1 finish materials are required, governed by U.C.B. Chapter 42 provisions..

For drawings and specifications, please contact your local Ceiling Designs, Inc. representative.
